

**BREAK OUT**

**The Missionary's  
Clean Water  
Conundrum  
Escape room**

Welcome to Haiti,

I had to go to another village. If I am not back in time, open the locked box and give the medicine. Key considerations are:

- 1) These surround me like a cloud of witnesses, 12 in 11, framing my days, reminding me of the mission. And I make 13. If you take the verse from the chapter, then add those up, you find the a key.
- 2) Remember what we had to do when the we couldn't use radios aboard our ships?
- 3) Proper dosages of meds is important. To heal the body Take with scripture to heal the soul
- 4) When I first arrived in Haiti, we went from Baie de Henne to Grand Riveiere du Nord to Kenscoff to Miragoane to Cotes-de-Fer

“They surround me like a cloud of witnesses, 12 in 11, framing my days, reminding me of the mission. And I make 13.”

If you take the verse from the chapter, then add the answers up, you find the a key.

*Do what fools do with words. Eccl. 10:14*

----- ✂  
*Psalms 119:139 What witch doctors do to God's message*

Week 1: I have convinced 3 villagers, too poor to pay the witch doctor the chicken he demands, to come to the clinic. They all have fever, chills, a dull frontal headache, dry cough and diffuse abdominal discomfort. I have noted relative bradycardia or pulse-temperature dissociation meaning the heart rate is relatively low given the degree of fever.

We held services Sunday and invited everyone to come. Only Jaquis and his other daughter came. He said everyone else was too afraid. The witch doctor had put a curse around our compound and anyone who crossed the line of the curse would suffer greatly. When I asked Jaquis how he had the courage to cross the line he said "I think your God is bigger than his curse." Praise the Lord!

Week 2: Four more have come to the clinic. All are willing to hear about our God. I notice that the fever plateaus at 103-104 degrees (39-40 degrees Celsius). Abdominal pain and distention occurs with adults experiencing constipation. But in children, diarrhea is more common. We see flat, salmon colored, blanching spots 2-4 mm in diameter on the chest and abdomen, hard to see in dark skinned individuals. I believe this is some aberration of typhoid fever. If so, an antidote to help the body fight the bacteria is possible.

If only the village had clean water.

Week 2: Four more have come to the clinic. All are willing to hear about our God. I notice that the fever plateaus at 103-104 degrees (39-40 degrees Celsius). Abdominal pain and distention occurs with adults experiencing constipation. But in children, diarrhea is more common. We see flat, salmon colored, blanching spots 2-4 mm in diameter on the chest and abdomen, hard to see in dark skinned individuals. I believe this is some aberration of typhoid fever. If so, an antidote to help the body fight the bacteria is possible.

Three of the witch doctor's "patients" have died. He is telling the villagers it is caused from the evil spirits' displeasure that we are here (preaching the gospel). He claims unless the villagers burn us out, they all will get sick and some will die. But three of our patients have walked out of the clinic, weak but well, and that has given the head man pause (one is his nephew) so the village takes a wait and see attitude.

Week 3: We are close to an antidote, a type of antibiotic, that will act as a prophylactic until a well that will furnish clean water can be dug. The most severe symptoms are occurring in the witch doctor's dwindling patient load: sepsis, intestinal bleeding and intestinal perforation.

Talked to Jaquis' extended family about "living water".

We had 42 at services Sunday and several come every day to hear the more about Jesus. An invitation has come from a neighboring village afflicted with this mutated disease. Is it a trap so the witch doctors in the area can waylay and kill me? Jaquis thinks so. But the headman said I should go, to show my God is bigger.

Monday: I have decided to go. It is critical the doses be given as scheduled. I will lock up half the serum. But in case I cannot return in time to pass out the serum, I will leave a way for believers to remove the locks and get to it. Paul had his many letters but Barnabas Zaul will leave just one letter with Jaquis' daughter. It will be enough.
